Projects

Clean YouTube

React.js · YouTube Data API · MUI · EasyPeasy

- Enabled users to import and manage YouTube playlists using the YouTube Data API.
- Implemented a favorite playlist feature with seamless add/remove functionality using EasyPeasy for state management.
- Designed a clean, responsive user interface with MUI, ensuring distraction-free browsing.
- Developed a recent playlist history tracker with options to view and delete specific items.

AI-Based Resume Builder

React.js · Google Gemini AI · Strapi · Tailwind CSS

- Built an intuitive platform for creating professional resumes with AI-generated features using Google Gemini AI.
- Implemented a feature to assess resume professionalism and provide actionable improvement suggestions.
- Integrated a responsive and visually appealing design using Tailwind CSS.
- Managed user data and content using Strapi as the backend CMS.
- Enabled seamless navigation and dynamic routing with React Router DOM.
- Provided functionality for users to delete specific resumes and update their content effortlessly.
